

ANIMAL TOOL CARE

Cleaning your Wahl clippers blades

WAHL®

EVERYDAY CLEANING

Your tools should be cleaned and sanitized after every client to prevent the spread of infectious skin diseases.

Start by brushing off excess hair on your blades.

Spray your clipper/trimmer blades with Wahl Clini-Clip, and allow to sit before wiping off any excess with a clean towel.

Ensure you also spray your combs, brushes and attachment combs with Clini-Clip as well.

Make sure you oil your blades immediately after using Clini-Clip with Wahl Blade Oil.

ANIMAL TOOL CARE

Cleaning your Wahl clippers blades

WAHL®

ONCE A MONTH CLEANING

Your Clipper blades should be removed periodically (at least once a month) to allow the cut hair to be cleaned out from under the blades.

Simply use a screwdriver to undo the blade screws and then remove the blades. Remove the sponge and clean it plus any hair that is caught in the clipper. Reverse the process to re-attach the blades.

All Wahl Clippers are tested before they leave our factory. Often testing materials or grinding compound may be found on the blades. This is easily cleaned off using the enclosed blade cleaning brush.

ANIMAL TOOL CARE

Oiling your Wahl clippers blades

WAHL®

HOW TO OIL YOUR BLADES

With the blade directed downwards, turn the clipper/trimmer on.

Apply three drops of oil – one on each side and one in the middle.

With the clipper/trimmer still on, move the taper lever back and forth to work oil into blade.

Turn off clipper/trimmer and blot excess oil with clean towel.

Always use Wahl Clipper Oil on your Wahl tools as it is specifically designed to extend the life of your blades.
